

## **Contract Management Control System Powerful Infrastructure Management**

CMCS is a contract management system designed for use by Councils, Help Desks and Waste and Recycling Contractors. At the heart of CMCS is a fully customisable rules engine. This allows CMCS to be easily adapted to any target environment. CMCS consolidates data from many external sources into one secure location. It is designed to take in comprehensive data inputs from a variety of subject areas and also output information in all common, open standard formats such as XML, CSV files, Excel formats etc.

- Complete contract Management
- Daily Weighbridge data entry both manually and electronically
- Manual/Electronic weight records from many sources
- Full data auditing and validation
- Comprehensive booking and scheduling system
- Advanced reporting and performance monitoring
- Invoicing
- Customer database
- Helpdesk/Customer service centre module
- Personnel administration
- Round scheduling and progress reporting
- Easy to use interface

CMCS can dramatically improve the efficiency of managing your contracts. The rules engine ensures that you are always operating within the specific requirements for each contract, improving performance and raising KPIs
